Business Profile

Intelligent Logistics. Built Today

Who we are?

Mondiale Global Logistics is a Pakistan-based logistics, sourcing, and supply chain partner supporting businesses, institutions, government-linked organizations and specialized-sector clients with end-to-end solutions from source identification to final delivery.

Founded in 2018, Mondiale provides complete support across sourcing, supplier coordination, procurement assistance, freight forwarding, customs clearance, warehousing, distribution, and domestic or international delivery. Our role goes beyond moving cargo. We help our partners find the right product, the right supplier, the right route, and the right delivery model. Whether the requirement involves defense-sector supplies, perishables, construction raw materials, minerals, industrial goods, or project-based cargo, Mondiale brings together market knowledge, logistics execution, compliance understanding, and operational control.

With offices and presence across Karachi, Lahore, Islamabad, Dubai, and Muscat, we are positioned to support partners across Pakistan and regional markets with reliability, transparency, and disciplined execution.

Vision/Mission

Vision

To become a trusted regional **logistics and sourcing partner**, enabling businesses, institutions, and specialized sectors to access the right products, reliable suppliers, and efficient supply chain solutions from source to final delivery.

Mission

Our mission is to simplify complex sourcing and logistics requirements by connecting our partners with the right suppliers, managing compliant and efficient cargo movement, and delivering end-to-end supply chain solutions with transparency, reliability, and operational discipline.

We aim to support our partners not only by moving goods, but by helping them identify, arrange, manage, and deliver the products and materials they require.

SERVICES THAT SUPPORT YOUR BUSINESS FROM SOURCE TO DELIVERY

Sourcing with confidence. Moving with control. Delivering with responsibility.

At Mondiale Global Logistics, our services are designed for partners who require more than transportation. We provide complete sourcing, logistics, and supply chain support for commercial, industrial, government-linked, and specialized-sector requirements. From identifying reliable sources and coordinating suppliers to managing freight, documentation, customs clearance, warehousing, and final delivery, Mondiale acts as a one-window partner for complex supply chain needs.

STRATEGIC SOURCING & PROCUREMENT SUPPORT

Mondiale Global Logistics helps partners identify, verify, and coordinate with reliable local and international sources for required goods, materials, equipment, and project supplies.

Our sourcing support includes supplier identification, product matching, commercial coordination, documentation assistance, shipment planning, and logistics execution from origin to destination.

We support partners who need access to specific products, raw materials, industrial items, defense-related supplies, perishables, construction materials, minerals, or project-based requirements. Our team works to understand the requirement, locate suitable sources, coordinate with suppliers, and structure the movement until delivery is completed.

Mondiale’s sourcing approach is built on reliability, transparency, compliance, and practical execution

END-TO-END SUPPLY CHAIN MANAGEMENT

Mondiale provides complete supply chain management from the initial requirement stage to final delivery. We coordinate supplier communication, cargo readiness, documentation, freight movement, customs clearance, warehousing, distribution, and last-mile delivery. This allows our partners to work through one reliable platform instead of managing multiple vendors, agents, transporters, and clearance parties separately.

Our end-to-end model is suitable for businesses and institutions that require controlled execution, cost visibility, timely updates, and accountability throughout the supply chain.

Whether the cargo is commercial, industrial, sensitive, perishable, bulk, or project-based, Mondiale manages the process with structured planning and operational discipline.

FREIGHT FORWARDING & CUSTOM CLEARANCE

Mondiale manages international and domestic cargo movement through air, sea, and road freight solutions. We coordinate with carriers, shipping lines, airlines, transporters, and handling agents to move cargo according to the urgency, budget, and nature of each shipment.

Our freight forwarding services include shipment planning, route selection, carrier coordination, booking, cargo documentation, export/import handling, and delivery coordination. We also provide customs clearance support, including documentation review, HS code guidance, duty and tax coordination, regulatory checks, and liaison with relevant authorities.

Our objective is to reduce delays, avoid documentation issues, maintain compliance, and keep our partners informed throughout the shipment cycle.

DEFENSE SECTOR SUPPLY CHAIN

Mondiale supports defense-sector and government-linked supply chain requirements through sourcing coordination, logistics planning, documentation support, and controlled delivery execution.

We are partners with some of the biggest name in defense sector that's why we understand that defense-related and sensitive-sector requirements demand confidentiality, reliability, compliance, traceability, and disciplined handling. Our team works with a structured approach to ensure that sourcing, movement, documentation, and delivery are managed with the required level of care.

Our support may include supplier identification, procurement coordination, import/export logistics, customs support, domestic transportation, warehousing, and project delivery management.
All defense-sector and sensitive cargo support is handled subject to applicable laws, approvals, permissions, and compliance protocols.

PERISHABLES & COLD CHAIN LOGISTICS

Mondiale provides logistics and supply chain support for perishables, food products, temperature-sensitive cargo, and time-critical goods.

We coordinate cold chain movement, reefer transportation, temperature-controlled storage, handling procedures, shipment documentation, and timely delivery planning to protect product quality from origin to destination.

Our perishables support is suitable for importers, exporters, distributors, food businesses, agriculture suppliers, pharmaceutical-related goods, and other clients requiring controlled movement.
We focus on speed, product safety, documentation accuracy, and continuous coordination to reduce risk during transit and storage.

CONSTRUCTION MATERIALS & SUPPLIES

Mondiale supports the sourcing, movement, and delivery of construction raw materials, industrial supplies, machinery, equipment, and project-related goods.

We work with contractors, developers, manufacturers, infrastructure companies, cement-sector buyers, trading houses, and project owners requiring reliable access to materials and controlled delivery.
Our capabilities include supplier coordination, bulk cargo planning, inland transportation, port handling, customs clearance, warehousing, and delivery to project sites.

Key materials and products may include limestone, aggregates, gypsum, dolomite, silica sand, slag, steel-related materials, machinery, spare parts, electrical items, mechanical items, and general industrial supplies.

MINERALS, COMMODTIES & BULK CARGO

Mondiale supports the sourcing, documentation, transportation, and delivery coordination of minerals, commodities, and bulk materials for local and international partners.

We assist clients with supplier connectivity, cargo readiness, quality coordination, inland transportation, port handling, freight planning, export/import documentation, and delivery execution.
Our experience in raw materials and bulk cargo allows us to support sectors such as cement, construction, infrastructure, manufacturing, trading, and industrial procurement.

We understand that mineral and bulk cargo supply chains require reliable sourcing, quantity control, shipment planning, port coordination, and cost-effective movement. Mondiale provides structured support from source to shipment and final delivery.

PROJECT CARGO & SPECIALIZED LOGISTICS

Mondiale supports complex, sensitive, oversized, high-value, regulated, and time-critical cargo requirements through customized logistics planning and execution.

Our project cargo support includes route planning, cargo handling coordination, transport arrangement, customs and documentation support, port coordination, site delivery, and end-to-end movement supervision.

We serve clients involved in construction projects, industrial development, infrastructure work, defense-related supply chains, minerals, machinery, and specialized procurement. Every project cargo movement is planned according to the cargo type, regulatory requirements, delivery timeline, handling sensitivity, and final destination. Mondiale's approach is practical, controlled, and focused on reducing risk during complex cargo movements.

“
Progress favors the prepared and the measurable. Intelligence guides the route and the discipline keeps it on time. Risks are anticipated, exceptions are managed, and performance is proven. This is where logistics becomes a competitive advantage.
”
